A FARMER STORYBOOK · YATTA

# Grow chilli. Own the harvest.

## Mavuno shambani, pesa mfukoni.

The story of Mwende and Mueni, two farmers from Yatta.

With **Christian Impact Mission** and **Mace Foods**

**Rent the system.**
**Own the harvest.**

1

spowdi
For a greener tomorrow

# Hard work. Small harvest.

## Kazi nyingi, mavuno kidogo.

**KES 4,000 diesel every week**
About KES 17,300 a month, before repairs

**Floods the field**
Water is wasted. Some plants drown, others dry.

**6+ hours a week**
Running the pump, moving hoses, buying fuel

**Waits for the rain**
Rain late? Planting is late. Dry spell? Crops die.

**1 harvest a year**
About 8 months with nothing growing

**Hours carrying water**
Buckets from the pan. Time lost from family and business.

One acre of maize, one season
**8 bags × KES 4,000 = KES 32,000**

Mwende's diesel for the same 4 months
**≈ KES 69,000**

**The fuel costs more than the harvest earns.**

2

spowdi

# Meet the Spowdi solar pump

**Jua ni bure. Maji kidogo. Mavuno zaidi.**

Mobile Pro MKII

Water at every root

**1**
**acre**
One pump waters a full acre

**80%**
**less water**
Drops go only to the roots

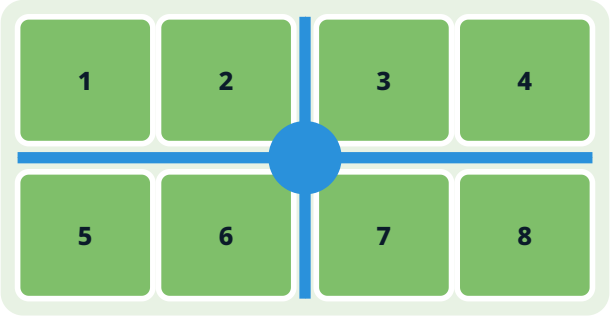

**3×**
**more harvest**
Right water, every day

**KES 0**
**for fuel**
The sun is free

**12 years**
Built to last

**Easy**
Open the valve. Walk away.

**Portable**
Carry it home safely at night

## Share with your neighbours

Plots side by side + one water source = one pump for up to 8 farmers. Each farmer owns a plot of 1/8 acre.

80% water saving and 12-year lifetime: Spowdi company presentation, June 2026. Up to 3× yield: Spowdi field results with ChildFund (2024). 3× depends on good farm management.

spowdi
For a greener tomorrow

# Two ways to join Spowdi NOVA

**Chagua njia yako ya kujiunga.**

## Nova Jamii

Group of up to 8 · one acre

Neighbours share one Spowdi pump. Your SACCO pays for your own drip kit.

SACCO drip kit for 1/8 acre

**KES 24,000**

| KES 2,000 | KES 1,000 |
|---|---|
| a month · 1 year | a month · 2 years |

Pump rental · KES 1,500 per member

**KES 12,000 /month**

paid by the group · month by month

→ Pages 4–7

**RENT the pump. OWN your drip kit when the SACCO is paid.**

## Nova Mkulima Mjanja

One farmer · ¼ acre · own it

Pay over 40 months and the whole system becomes yours.

Solar pump, panel and drips

**¼ acre**

Chilli seeds packed in your box. Lime, ploughing and plant feeding (EasyGro, BoomFlower) from Spowdi.

KES 6,000 deposit, then

**KES 6,000 /month**

for 40 months · then it is yours

→ Page 8

**OWN Seeds in the box: only in this plan. Water within 5 m depth.**

## Both plans include these services:

- Soil test by Spowdi
- Free installation
- Inputs from partners
- Agronomy & training
- Crop & health insurance
- Weather forecast
- Call centre check-ups
- Guaranteed market
- Smart farming tips
- Repairs & swaps

PATH A · NOVA JAMII

spowdi
For a greener tomorrow

# Farm together. Own your drip kit.

## Limeni pamoja, mvune pamoja.

Mwende's neighbours chose Nova Jamii: up to 8 farmers, one acre, one shared Spowdi pump. Each one farms their own 500 m² plot.

## From group to harvest in six steps

**1 Form the group** GROUP

Up to 8 members agree who farms which plot, who does the shared jobs and what each will plant.

**2 Apply at your SACCO** GROUP SACCO

Bring one group file to your SACCO or cooperative. The checklist is on the next page.

**3 Kit loans approved** SACCO

The SACCO checks each member and lends KES 24,000 for each member's drip kit.

**4 Site check & installation** SPOWDI

Spowdi checks the water and the land, installs the shared pump and 8 drip kits, and trains you on the day.

**5 Farm & pay monthly** GROUP

Water your plot on the group rota. Pay the group rental and your SACCO kit loan each month.

**6 Hub support, then renew** SPOWDI GROUP

The CIM hub fixes problems within 72 hours. Keep renting month by month while you farm.

5

PATH A · NOVA JAMII

spowdi
For a greener tomorrow

# Get ready: your group file

## Andaa faili la kikundi.

One file for the whole group. The SACCO keeps it and shares a copy with Spowdi before the site visit.

### Bring to the SACCO

**Group proof**
Registration certificate or signed member list, with SACCO numbers

**Joint farming agreement**
Minutes signed by all members, agreeing to Nova Jamii terms

**Land proof**
Title deed, allotment letter or a 12-month lease for one acre of plots side by side

**Plot plan**
Who farms which plot, and who does each shared job

**Crop plan**
What each member will plant, and when

**IDs and M-Pesa numbers**
A copy of each member's national ID and phone number

### The site must have

- **Water all through the dry season, close to the plots**
- **Water lift of 5 m or less, deep enough to keep the pump under water**
- **An open, sunny spot for the solar panel**
- **Crops that fit drips every 30 cm: chilli, tomato, sweet pepper, watermelon**

Panel in the sun, pump in the pond

## Share the jobs

### Group chair
Main contact for Spowdi, CIM and the SACCO.

### Treasurer
Collects KES 1,500 from each member and pays Spowdi KES 12,000 by the 5th. Keeps the record.

### Rota lead
Switches on in the morning, opens one plot valve at a time, switches off at sunset.

### Water lead
Keeps the pump under water. Rinses the filter every week.

### Equipment lead
Wipes dust off the panel. Keeps it facing the sun. Keeps the Power Box safe.

### Every member
Walks the plot, fixes kinks, closes the end stoppers after flushing.

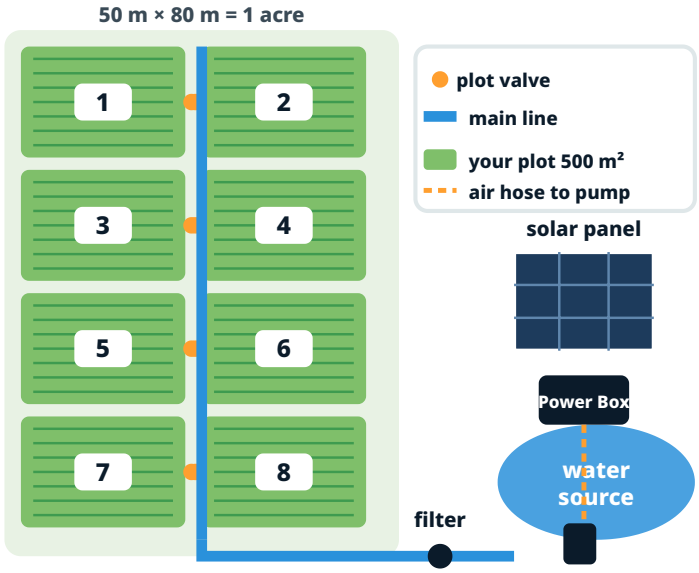

6

PATH A · NOVA JAMII

spowdi
For a greener tomorrow

# One acre, eight plots, one solar pump

## Ekari moja, mashamba manane, mfumo mmoja.

### One main line, eight valves

The main line runs down the middle. Each plot has its own valve, so each member waters on their own turn.

### The plot rota

One plot uses about 22 litres a minute, the same as the pump gives. So the group waters **one plot at a time**, about **1 hour per plot each day**. The agronomist adjusts it to your crop.

## How the pump moves water: no fuel, no motor in the water

**Sunlight** free → **Solar panel** 150 W → **Power Box** makes air · 100 W → **Pump in water** no moving parts → **Filter + valve** keeps drips clean → **Your drip kit** water at the root

Water 1 metre below the plots

**16,800 L**

**a sunny day · 35 L a minute**

Water 5 metres below the plots

**12,000 L**

**a sunny day · 25 L a minute**

Pump figures: Spowdi Mobile Pro MKII technical specification. Daily output depends on sunshine. Layout drawing not to exact scale: eight plots of 25 m × 20 m.

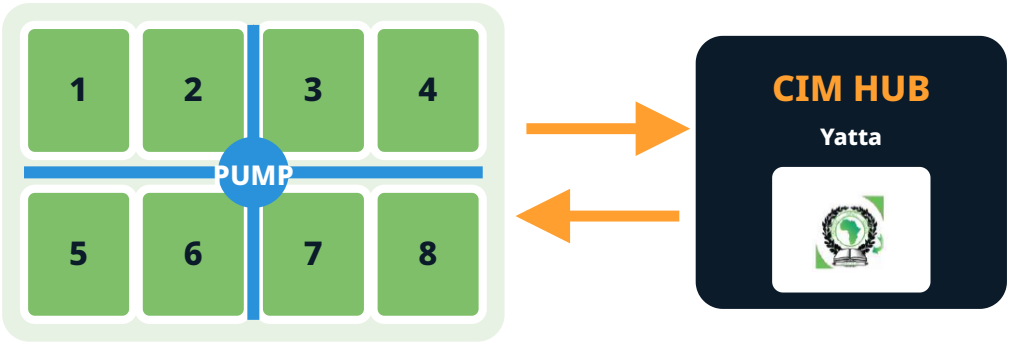

7

PATH A · NOVA JAMII

spowdi
For a greener tomorrow

# Nova Jamii: one pump, eight farmers

## Mfumo mmoja, wakulima wanane.

1 acre · 8 neighbours · one water source

**Repairs in 72 hours**

**Swap a faulty part**

**Not farming? Return the pump**
Rental stops

**Deliver your dried chilli**

EACH MEMBER OWNS

## Your drip kit

**500 m² drip lines + fittings (1/8 acre)**

KES 24,000, paid for by your SACCO.
You repay the SACCO KES 2,000 a month for 1 year, or KES 1,000 a month for 2 years.

✓ **Yours to keep**

THE GROUP RENTS

## The shared pump set

**Pump unit · solar panel 150 W · Power Management Box 100 W**

Spowdi owns and maintains it.
Rent it month by month. Minimum: one month.

**KES 1,500 × 8 = KES 12,000 a month**

### How the group pays

**Each member gives the group treasurer KES 1,500** → **The treasurer pays Spowdi KES 12,000 by the 5th** + **Each member repays the drip kit to the SACCO**

8

PATH B · NOVA MKULIMA MJANJA

spowdi
For a greener tomorrow

# Nova Mkulima Mjanja: farm alone, own it

## Mkulima mjanja, mfumo wako mwenyewe.

Mueni wanted her own system on her own land. With Mkulima Mjanja she pays for 40 months, and then the whole system is hers.

Your own Spowdi toolkit

¼ acre of drip lines

## What comes in your box ALL INCLUDED

**¼-acre drip system**
Solar pump, panel and full drip lines

**Chilli seeds for ¼ acre**
Certified seed, packed in your box

**Soil test, lime & ploughing**
Land tested and prepared by Spowdi

**Plant feeding**
EasyGro and BoomFlower from Spowdi

**Training**
From seedling to harvest

**Crop & health insurance**
Cover for your crop and your family

PAY IN EASY STEPS

**KES 6,000 deposit + KES 6,000 / month**

**Spowdi installs, maintains, repairs and replaces the system while you pay.**

**40 months**

## Grow more: add extension kits

Green: your ¼ acre. Orange: room to grow. The same pump waters up to **one full acre**. Each extra 500 m² kit costs about KES 24,000 and can sell up to **KES 100,000** of dried chilli a year in a good harvest, before farm costs.

## Need money for more kits?

Ask your **SACCO** or **bank** for credit. Show them your Spowdi records and your CIM sales slips: they prove your harvest.

**More kits = more profit**

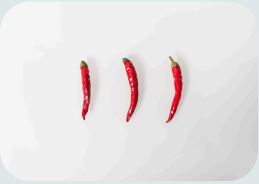

Farm of 1 acre or less, water within 5 m depth. Extension kit price: Spowdi Nova Jamii programme (KES 24,000 per 500 m² kit). Good-harvest sales: 250 kg dried chilli per 500 m² at KES 400/kg.

9

spowdi
For a greener tomorrow

# Money in your pocket

## Pesa mfukoni.

Dried African Bird's Eye chilli sells at **KES 400 a kg** through CIM. A good farmer harvests **2,000 kg of dried chilli per acre a year**. Soil test from Spowdi for all. Seeds and plant feeding come free only with the Nova Mkulima Mjanja plan.

### 1 acre

**Nova Jamii · 8 members**

| | |
|---|---|
| Chilli sold<br>2,000 kg × KES 400 | + 800,000 |
| Seeds & nursery<br>year 1 only | − 52,060 |
| Fertiliser, sprays, transport<br>8 plots | − 81,600 |
| Drip kits to SACCO<br>8 × 2,000 × 12 months | − 192,000 |
| Group pump rental<br>12,000 × 12 months | − 144,000 |

Year 1 · each member

**≈ KES 3,440 /month**

**KES 41,290 a year · group KES 330,340**

Year 2 · drip kit paid, plants keep bearing

**≈ KES 5,980 /month**

**each member · KES 71,800 a year**

### ¼ acre

**Mkulima Mjanja · own it in 40 months**

| | |
|---|---|
| Chilli sold<br>500 kg × KES 400 | + 200,000 |
| Sprays & transport to CIM<br>your ¼ acre | − 9,100 |
| Spowdi monthly<br>6,000 × 12 months | − 72,000 |

Year 1 also: KES 6,000 deposit

While paying · you alone

**KES 9,900 /month**

**KES 118,900 a year**

After 40 months · the system is yours

**≈ KES 15,900 /month**

**KES 190,900 a year · no more payments**

**Rain maize, one acre ≈ KES 2,700 a month**

**Add kits with SACCO or bank credit = more profit**

Good-harvest figures from the Spowdi 360° Own the Harvest plan: 2,000 kg dried chilli per acre a year. You use family labour. Results depend on good farming and the weather; they are not a promise.

# Your growth journey

## Andika kila hatua. Tushirikiane data.

Write down and photograph every stage. When we see your farm, we can help you faster.

**1 · Day zero: baseline**
Your land, your water, your soil test, what you harvest today

Why?
**So we can see how much you grow**

**2 · Installation & planting**
Date installed, date planted, seed used

**Take a photo**

**3 · Growing**
Fertiliser and spray: what, how much, which day

**Photo every week**

**4 · Problems**
Pests, sick leaves, a leaking pipe? Record it and call us the same day

**Call or WhatsApp**

**5 · Harvest & sale**
Kilos picked, kilos dried, kilos sold, money received

**Keep every slip**

**Share your records with Spowdi and CIM**
Your data helps us send the agronomist on time, plan the market and give you better advice. We keep it safe.

11

spowdi
For a greener tomorrow

# Avoid these. Keep your profit.

## Epuka makosa haya.

### Fake seed or chemicals
Use only the seed and inputs from the box or the partners

### Ignoring pests
Check leaves every week. Call when you see damage.

### Spraying near harvest
Follow the label waiting days. Chilli with spray left on it is rejected.

### Late picking
Pick red-ripe chilli every week. Poor picking can cut harvest by half.

### Blocked drips
Clean the filter. Flush the lines. Fix leaks the same day.

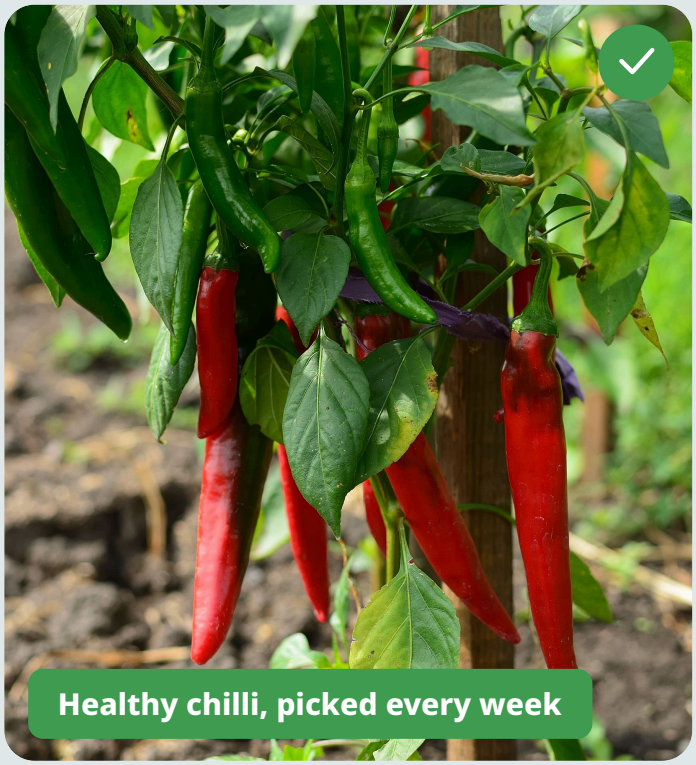

### Pump out of water
Keep the pump at least 30 cm under the water. Dig a small pit in a shallow pan.

### Weeds & animals
Weeds steal water. Fence out goats. Do not hoe over drip lines.

### Selling to brokers
Low price, no record, broken contract. Sell only through CIM.

Pest damage left too long

Healthy chilli, picked every week

12

spowdi
For a greener tomorrow

# Dry it right. Get Grade I.

## Kausha vizuri, uuze kwa bei nzuri.

## ✓ Do this

**Pick red-ripe only**
No green, no rotten

**Remove stems**
And broken fruit

**Racks or tarpaulin**
Thin layer, turn daily

**Clean dry bags**
Cool, dark, off the floor

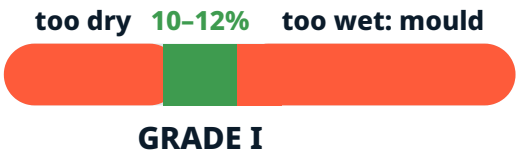

## × Never do this

**Dry on bare soil**
Dirt and mould

**Leave in the rain**
Cover at night

**Mix varieties**
One type per bag

**Stones or insects**
Sort before bagging

**Moisture 11% (±1%)**
CIM checks every bag with a moisture meter. Wet chilli grows mould (aflatoxin) and is rejected.

13

spowdi
For a greener tomorrow

# Deliver to CIM. Get paid.

**Pima mbele yako. Lipwa papo hapo.**

| 1 | 2 | 3 | 4 | 5 |
|---|---|---|---|---|
| **Bring to the CIM centre** | **Watch it weighed** | **Grade checked** | **Take your slip** | **Paid on M-Pesa** |

## Before you leave the centre

✓ See the scale with your own eyes ✓ Check kilos on your slip ✓ Check your name and phone number ✓ Keep the slip safe

Mace Foods pays, dried Grade I chilli

# KES 400 / kg

**10 kg delivered = KES 4,000**

### Broker

× Lower price
× Scale may be wrong
× No record of your harvest
× Breaks your offtake contract
× Your support can stop

### CIM centre

✓ KES 400 a kg, every time
✓ Fair, open weighing
✓ Your harvest is recorded
✓ Payment to your phone
✓ Help for next season

14

spowdi
For a greener tomorrow

# If you cannot pay, talk to us early

## Ukishindwa kulipa, ongea nasi mapema.

Pay between the **1st and 5th** of every month. If something goes wrong, call us before the date.

**STEP 1 · PAY ON TIME**

### 1st–5th of the month

Your services keep running: agronomy, insurance, market.

▼

**STEP 2 · PAYMENT MISSED**

### A Spowdi installer visits you

We listen and understand the problem: sickness, a failed crop, school fees.

▼

**STEP 3 · GRACE PERIOD**

### We agree a time to catch up

Keep your promise and keep farming.

▼

**STEP 4 · MORE THAN ONE MONTH UNPAID**

### Spowdi takes the system back

The pump goes to another farmer. Your harvest income stops.

**Nova Jamii:** the rental is one group payment. If one member is late, the whole group is late. Agree in the group how you will help each other.

**Problem? Call 0709 008 955 before the 5th.**

15

spowdi
For a greener tomorrow

# How to pay

## Lipa kwa M-Pesa.

**M-PESA**

Lipa na M-PESA

**Pay Bill**

Business no.
**4837923**

Account no.
**Your Spowdi Customer ID**

Amount
**KES ___**

PIN ••••

1. **Open M-PESA → Lipa na M-PESA**
2. **Choose Pay Bill**
3. **Business no. 4837923**
4. **Account: your Customer ID**
   It is on your Spowdi SMS and card
5. **Amount, PIN, send**
6. **Keep the M-Pesa SMS**
   It is your receipt

**Nova Jamii groups:** the treasurer pays the group's KES 12,000 rental on this Pay Bill, in one payment. Each member pays the drip kit loan to the SACCO, the way the SACCO tells you.
